USAGE INSTRUCTIONS

Tool is intended for installation of fork dust seals on front fork suspension. Based on the seal dimension, appropriate version of the tool (1) is used 30mm (624366), 32mm (623024), 34mm (623025), 35mm/36mm (623026) or 40mm (623027). We position the dust seal onto the fork parallel to the fork opening and insert the chosen tool (2). With multiple hits on the tool, we make sure that the dust seal is firmly seated into the fork (3). Tool is made from firm plastic and does not damage the seal or the fork housing.

Orodje je namenjeno montaži prašnih tesnil na prednjih vilicah. Glede na dimenzijo tesnila, se izbere primerno izvedbo orodja (1) 30mm (624366), 32mm (623024), 34mm (623025), 35/36mm (623026) ali 40mm (623027). Prašno tesnilo namestimo vzporedno na odprtino na vilici in vstavimo izbrano orodje (2). Z večkratnimi udarci kladiva po orodju, tesnilo namestimo do popolnoma vodoravne lege (3). Orodje je izdelano iz trdne plastike in ne poškoduje tesnila ali ohišja vilice.
