UNIOR is the leader in the quality hand tool field for professional and end users.

The Unior Joint Stock Company is one of the largest and most important European manufacturers of hand tools, drop forgings and machine tools. Our dependable performance is based on the rich tradition of Slovenian forging. This tradition, coupled with up to date expertise, ensures innovative and top quality products. Permanent compliance with the highest European and World standards maintains and strengthens the company's position as an important international provider of quality products and services in the field of the metal processing industry. Today the company is highly regarded and employs state of the art production processes and people with exceptional experience and knowledge.

Collaboration of many experts in the company, mechanics on the field and needs on the market has brought into the life a line of high quality automotive tools for service and maintenance of the cars. The line includes a wide selection of special tools designed and divided for different areas of the car.

The tools with it's functionality and long life line offer a quick, safe and easy repair of the majority car brands without using extra energy or damaging the parts of the repair.

Automotive tools – tools on which can rely every car repair shop!
