Disc spreader for motorcycle

3303/2

Profiles

Product features

- material: premium plus carbon steel
- surface finish: chrome plated to standard ISO 1456:2009

Usage:

- The tool is used for compressing brake pistons when replacing brake pads. The tool is useful for compressing single, double and triple brake pistons The tool enables quick and easy pressing of brake pistons back into the housing without additional damage to the piston or the housing.

Important!

- For compressing double or triple brake pistons, we leave the used brake pads in the brake housing. This will prevent one of the pistons being pushed from the housing.

- after compressing replace the worn out brake pads with the new one
