Vassoi portautensili SOS - vantaggi:

- materiale: schiuma di polietilene a bassa densità
- I vassoi SOS sono fabbricati con un doppio strato di polietilene espanso, resistente al grasso, alla benzina, al petrolio, ai diluenti nitro, alle colle e all'olio per motore, che possono essere facilmente rimossi senza lasciare residui visibili (macchie). Colle ed olio per motore devono essere rimossi immediatamente, pulendo con della benzina per evitare il formarsi di macchie permanenti.
- These tool trays of polyethylene foam are used for clearer and better organised tool storage in tool boxes, tool cases, the drawers of tool carriages and tool cabinets. These tool trays can be used in a wide range of temperatures, do not absorb dampness and, with normal use, have a long lifespan. They protect the tools by holding them in their own specifically designed place, thus preventing them from moving uncontrollably around in the storage area. As the positions in the tray are precisely defined and designed for each specific tool, it is also easy to establish which tools are missing.
