Ложкементы SOS – преимущества:

- материал: пенополиэтиленовая пенка
- Вставки SOS сделаны из двухслойного пенополиэтилена, стойкого к грязи, бензину, маслу, нитрогидролизаторам, клеям и моторному маслу, которые можно легко удалить, не оставляя видимых следов (пятен). Клеи и моторные масла необходимо удалять немедленно при помощи бензина, чтобы избежать образования постоянных пятен.
- These tool trays of polyethylene foam are used for clearer and better organised tool storage in tool boxes, tool cases, the drawers of tool carriages and tool cabinets. These tool trays can be used in a wide range of temperatures, do not absorb dampness and, with normal use, have a long lifespan. They protect the tools by holding them in their own specifically designed place, thus preventing them from moving uncontrollably around in the storage area. As the positions in the tray are precisely defined and designed for each specific tool, it is also easy to establish which tools are missing.
