

# Kliješta elektrokombinirke

420/1VDEBI

## Profili

## Standardi

DIN EN IEC 60900 (VDE 0682-201):2019-04; EN IEC 60900:2018

## Atributi proizvoda

- materijal: poseban alatni čelik
- kovana, potpuno poboljšana i ojačana
- rezni rubovi induktivno kaljeni
- čeljusti polirane
- završna obrada: kromiranje po standardu ISO 1456:2009
- robusne ručke izolirane dvokomponentnim navlakama
- izrađeno po standardu EN IEC 60900

## Upotreba (pictures)

## Safety tips

- Pliers should be oiled regularly. A drop of oil at the hinge will lengthen the tool life and assure easy operation.
- When cutting wire with pliers, you should always wear glasses or goggles.

- Don't use pliers for cutting hardened wire, unless specifically manufactured for this purpose.
- Don't expose pliers to excessive heat. This may ruin the tool.
- Don't use pliers as a hammer.
- Don't hammer on the handles. They may crack or break.
- Don't extend the length of plier handles to secure greater leverage.
- Don't use pliers on nuts or bolts. A wrench will do a better job and with less risk of damage to the fastener.

## Frequently asked questions

### **Are certified insulated tools made through a different procedure than non-certified insulated tools?**

The tools are made according to the same procedure.

### **Are insulated (VDE) tools considered as personal protective equipment (PPE)?**

According to EU regulations, VDE tools are not considered as PPE.

**Is it possible to work with insulated pliers under electrical voltage?**

Yes, but only by professionals who follow safety requirements and use additional personal protective equipment.

**Are the VDE tools only being sampled in series production?**

The high voltage test (at 10kV) is performed fully on each tool. Other tests are performed in accordance with the EN60900 standard.
