## Safety tips

# $\checkmark$

• Be careful of sharp edges on the cutting edges of these tools.

• Use only hand pressure for cutting.

• Snips should be carefully put away after use. Wipe the cutting edges with a lightly oiled rag.

• Oil the pivot bolt on the snips occasionally.

• Don't try to cut sharp curves with straight cut snips.

• Don't resharpen a snip blade.

• Don't use snips as a hammer, screwdriver or pry bar. Use proper tools for the job.

• Don't store snips in a drawer with other tools. Tools with cutting edges should always be treated with extra respect.

• Never hammer, or use your foot to get extra pressure on the cutting edges.

## Frequently asked questions

#### Can a left-handed person use right-handed cutters?

Yes, the left-handed or right-handed scissors are intended for the direction of the radius cut.
