

# 压线钳

427/4CG

## 配置文件

**Premium** + 

## 产品属性

- 材料:金属板材
- 表面处理：根据ISO 9717标准进行磷酸盐处理
- 重型双成分材料手柄

## 优势：

- 特殊设计的夹钳可在剥线过程中，牢牢夹住电线

## 用途：

- 旋转把手微调细电线至30AWG (0.05mm<sup>2</sup>) 或微调粗电线至8AWG (8mm<sup>2</sup>)
- 压接非绝缘端子10-22AWG ( 1.5至6.0mm<sup>2</sup> )
- 压接绝缘端子10-22AWG ( 1.5至6.0mm<sup>2</sup> )

## Frequently asked questions

### Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?

When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.
