

# 压线钳

427/4CG

## 配置文件

**Premium** + 

## 产品属性

- 材料:金属板材
- 表面处理:根据ISO 9717标准进行磷酸盐处理
- 重型双成分材料手柄

## 优势:

- 特殊设计的夹钳可在剥线过程中,牢牢夹住电线

## 用途:

- 旋转把手微调细电线至30AWG (0.05mm<sup>2</sup>) 或微调粗电线至8AWG (8mm<sup>2</sup>)
- 压接非绝缘端子10-22AWG (1.5至6.0mm<sup>2</sup>)
- 压接绝缘端子10-22AWG (1.5至6.0mm<sup>2</sup>)

## Frequently asked questions

### **Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?**

When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.
