

# Kliješta grip za kableske kontakte

427/4CG

## Profili

---

**Premium** + 

## Atributi proizvoda

- materijal: Premium Plus ugljični čelik
- završna obrada: fosfatiranje po standardu DIN12476
- robusne ručke izolirane dvokomponentnim navlakama

## Prednosti:

- posebno oblikovane čeljusti kliješta sigurno drže kabel prilikom skidanja izolacije

## Upotreba

- okretni gumb za mikro-podešavanje debljine žice: od 30AWG (0.05mm<sup>2</sup>) do 8AWG (8mm<sup>2</sup>)
- pričvršćivanje neizoliranih stopica 10-22AWG (1.5-6.0mm<sup>2</sup>)
- pričvršćivanje izoliranih stopica 10-22AWG (1.5-6.0mm<sup>2</sup>)

## Frequently asked questions

**Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?**

When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.
