

# 压线钳

427/4DG

## 配置文件

**Premium** + 

## 产品属性

- 材料:金属板材
- 表面处理:根据ISO 9717标准进行磷酸盐处理
- 重型双成分材料手柄

## 优势:

- 平行压接工艺使压接更精确

## 用途:

- 用于压接6-和8-极Western插头RJ 11/12 (9.65 mm宽)和RJ 45型 (11.68 mm宽)
- 无铠装带状电话线的切割和剥线工具
- 配有圆形电缆的额外剥线设备
- 配有长度切割器以及带状电缆 (6和12 mm宽) 用拆卸刀

## Frequently asked questions

### **Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?**

When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.
