

压线钳

427/4DG

配置文件

Premium + 

产品属性

- 材料:金属板材
- 表面处理:根据ISO 9717标准进行磷酸盐处理
- 重型双成分材料手柄

优势:

- 平行压接工艺使压接更精确

用途:

- 用于压接6-和8-极Western插头RJ 11/12 (9.65 mm宽)和RJ 45型 (11.68 mm宽)
- 无铠装带状电话线的切割和剥线工具
- 配有圆形电缆的额外剥线设备
- 配有长度切割器以及带状电缆 (6和12 mm宽) 用拆卸刀

Frequently asked questions

Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?

When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.
