

压线钳

427/2FG

配置文件

Premium +   

产品属性

- 材料:金属板材
- 夹钳淬火至38-40HRC
- 极易处理

优势：

- 六角压接
- 通过旋转端口圆盘，设置对应的线缆线径
- 有6、10、16、25、35、50mm² 6个位置旋转凹槽
- 杠杆原理，用力小

Frequently asked questions

Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?

When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.
