

# 压线钳

427/2FG

## 配置文件

**Premium** + 

## 产品属性

- 材料:金属板材
- 夹钳淬火至38-40HRC
- 极易处理

## 优势：

- 六角压接
- 通过旋转端口圆盘，设置对应的线缆线径
- 有6、10、16、25、35、50mm<sup>2</sup> 6个位置旋转凹槽
- 杠杆原理，用力小

621555

6 - 50

## Frequently asked questions

**Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?**

When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.
