

# TBI柄粗短十字(PH)螺丝刀

626TBI

## 配置文件

## 标准

DIN ISO 2380-1:2006 and DIN ISO 2380-2:2006

## 产品属性

- 螺丝刀：切割器 - 特种工具钢、锻造、完全淬火与回火，完全淬火与回火
- 镀铬刀片，黑色刀头
- 手柄：符合人体工程学的形状
- 三种成分组成的材料
- 挂孔
- 根据ISO 8764-1,2标准生产

## Safety tips

- Use a screw holding screwdriver to get screws started in awkward, hard-to-reach areas.
- Use a stubby screwdriver in close quarters where a conventional screwdriver cannot be used.
- A rounded tip should be redressed with a file; make sure edges are straight.
- Screwdrivers used in the shop are best stored in a rack. This way, the proper selection of the right screwdriver can be quickly made.
- Keep the screwdriver handle clean; a greasy handle is apt to cause accidents.
- A screwdriver should never be used as pry bar. If it is overstressed in this manner, the blade might break and send a particle of steel into the operator's arm or even towards his eyes.

- Don't use pliers on the handle of a screwdriver to get extra turning power. A wrench should only be used on the square shank or bolster of a screwdriver that is especially designed for that purpose.
- Don't expose a screwdriver blade to excessive heat as it may reduce the hardness of the blade.
- Don't use a screwdriver with a split or broken handle.
- Don't use a regular screwdriver to check a storage battery or to determine if an electrical circuit is live.

## Safety (pictures)

## Frequently asked questions

### Can you hit the screwdriver?

No, you should not hit the screwdriver.

### How do we clean a multi-component handle?

With cleaning agents designed for PP/TPE material.

**Can a screwdriver with a PH tip be used for PZ cross head screws?**

Its use is not recommended as this can cause damage to the screw.
