

# Puller with two sliding arms

683/2

## Profiles

## Product features

- material: body from premium flex plus carbon steel, arm from premium chrome vanadium steel
- drop forged, entirely hardened and tempered
- surface finish: trivalent chrome plated according to ISO 1456:2009, screw blackened
- lever action claws fit closely under the part to be removed

## Advantages:

- by reversing the arms, the puller can be used as internal or external puller

	Nº	L↑	D1	D2	$F_{max}$ →	$t_{max}$ →	M	S

## Frequently asked questions

**Can we achieve greater pulling force using a three-arm puller compared to a two-arm puller?**  
It depends on the dimensions. In principle, yes, because the force is distributed over several arms.

**One arm broke. Do I have to replace all the arms or just the broken one?**

It is necessary to change all the arms.
