Introduceti bratele extractorului (3x) in locasurile extractorului ce corespund numarului de gauri. De exemplu, daca roata are 5 deschideri, introduceti bratele extractorului (3x) in toate sloturile marcate cu numarul 5

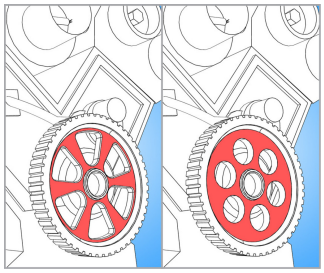

Introduceti bratele extractorului in deschiderile fuliei

Rotiti arborele in sensul acelor de ceas pana la iesirea fuliei

Dupa ce terminati, scoateti extractorul
