

Stroke pneumatic hammer

1514

Profiles

Product features

- used for cutting sheet, bolts and removing welding slag, rivets, plaster and tiles
- with spring, quick change retainer as spare parts
- piston stroke length: 170 67mm, 225 92mm
- bore diameter 9,1mm
- stroke per minute: 170 3000, 225 2100
- air consumption 250 l/min
- air inlet 1/4"

Advantages:

- light and compact tool, used also in small rooms
- wide range of use
- change retainer

Usage:

- car industry
- cutting of sheet metal and screws
- removal of welds
- working on walls, concrete, stones, bricks, steel, light metals

Safety tips

• The pressure in the tool during the operation has to be at least 6.2 bar for the tool to work properly.

• Regularly clean and dry the air filters and inlet air supply.

• Always use clean and dry air with the correct mixture of oil, for maximum tool life.

• Always disconnect tools not in use from the air supply.

• Check the joints and ensure that the tubes and other equipment are not damaged before use.

• All tools should be gently oiled prior to being stored.

• Always store pneumatic tools in dry places away from water.

• Always use original spare parts.

• Repairs can be performed only by authorised staff people authorised by Unior d.d.
