

Biax pneumatic unghiular

1516A

Profile

Caracteristicile produsului

- viteza de rotatie 20000 rotatii/minut
- Presiunea maxima de aer comprimat: 6, 2 Bar
- consum de aer comprimat 113 l/min
- Racord de aer 1/4"
- capacitate de prindere mandrina 6 mm
- diametrul interior furtun 10mm

Avantaje:

- aceasta varianta unghiulara permite accesul in zone dificile in care in mod normal nu se poate face polizarea
- levier de siguranta care previne pornirea accidentala
- prindere simpla a discurilor de slefuire si a celorlalte parti/extensii
- putere mare bazata pe marime
- scula mica si compacta

- reglare continua si variabila a rotatiei

Utilizare

- polizare precisa
- polizare completa
- scula industriala
- industria auto
- industria aerospatiala
- curatarea sudurii
- curatarea betonului si a suprafetelor de pereti
- curatirea suprafetelor de lemn
- inlaturarea vopselelor si a lacurilor
- inlaturarea ruginii
- curatire rulmenti
- curatire valve motor
- curatire piniane si ambreiaje
- alte suprafete diverse

Safety tips

- The pressure in the tool during the operation has to be at least 6.2 bar for the tool to work properly.
- Regularly clean and dry the air filters and inlet air supply.
- Always use clean and dry air with the correct mixture of oil, for maximum tool life.
- Check the joints and ensure that the tubes and other equipment are not damaged before use.

- Always disconnect tools not in use from the air supply.

- All tools should be gently oiled prior to being stored.
- Always store pneumatic tools in dry places away from water.
- Always use original spare parts.
- Repairs can be performed only by authorised staff people authorised by Unior d.d.
