

Pinza universale isolata

406/1VDEDP

Profili

Standard

DIN EN IEC 60900 (VDE 0682-201):2019-04; EN IEC 60900:2018

Attributi del prodotto

- materiale: acciaio al carbonio plus premium
- forgiato a caldo, interamente bonificato e temprato
- bordi di taglio induriti a induzione
- teste lucidate
- finitura superficiale: cromata EN 12540
- conforme allo standard ISO 5746 e EN IEC 60900

Vantaggi:

- impugnatura bicomponente - bicolore isolata, per una doppia sicurezza

Importante!

- se è visibile il secondo strato, sostituite il vostro attrezzo VDE con uno nuovo.

Safety tips

- Pliers should be oiled regularly. A drop of oil at the hinge will lengthen the tool life and assure easy operation.
- When cutting wire with pliers, you should always wear glasses or goggles.

- Don't use pliers for cutting hardened wire, unless specifically manufactured for this purpose.
- Don't expose pliers to excessive heat. This may ruin the tool.
- Don't use pliers as a hammer.
- Don't hammer on the handles. They may crack or break.
- Don't extend the length of plier handles to secure greater leverage.
- Don't use pliers on nuts or bolts. A wrench will do a better job and with less risk of damage to the fastener.

Frequently asked questions

Are certified insulated tools made through a different procedure than non-certified insulated tools?

The tools are made according to the same procedure.

Are insulated (VDE) tools considered as personal protective equipment (PPE)?

According to EU regulations, VDE tools are not considered as PPE.

Is it possible to work with insulated pliers under electrical voltage?

Yes, but only by professionals who follow safety requirements and use additional personal protective equipment.

Are the VDE tools only being sampled in series production?

The high voltage test (at 10kV) is performed fully on each tool. Other tests are performed in accordance with the EN60900 standard.
