

# Clesti combinati maner bimateial

405/1BI

## Profile

## Standarde

DIN ISO 5746

## Caracteristicile produsului

- material:compozitie speciala pentru calire revenire
- tratat complet
- partile taietoare tratate prin inductie
- cap polizat
- finisare:cromat in conformitate cu standardul EN12540
- manere bimaterial pentru conditii grele
- in conformitate cu standardul ISO 5746

	L	B	C	A

## Safety tips

- Pliers should be oiled regularly. A drop of oil at the hinge will lengthen the tool life and assure easy operation.
- When cutting wire with pliers, you should always wear glasses or goggles.
- Handles are provided for comfort. They are not intended to give user any degree of protection against electric shocks and should never be used on live electric circuits.

- Don't use pliers for cutting hardened wire, unless specifically manufactured for this purpose.
- Don't expose pliers to excessive heat. This may ruin the tool.
- Don't use pliers as a hammer.
- Don't hammer on the handles. They may crack or break.
- Don't extend the length of plier handles to secure greater leverage.
- Don't use pliers on nuts or bolts. A wrench will do a better job and with less risk of damage to the fastener.
