

钢丝钳

406/1BI

配置文件

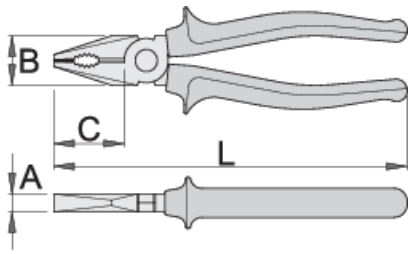

标准

ISO 5746

产品属性

- 材料:优质高碳钢
- 落锻,完全淬火与回火
- 切削刃感应淬火
- 头部抛光
- 表面处理:根据ISO 1456:2009标准镀铬
- 重型双成分材料手柄
- UNIOR激光喷码
- 根据ISO 5746标准生产

Barcode	L	B	C	A	Weight

用途 (pictures)

Safety tips

- Pliers should be oiled regularly. A drop of oil at the hinge will lengthen the tool life and assure easy operation.

- Don't use pliers for cutting hardened wire, unless specifically manufactured for this purpose.
- Don't expose pliers to excessive heat. This may ruin the tool.

- When cutting wire with pliers, you should always wear glasses or goggles.
- Handles are provided for comfort. They are not intended to give user any degree of protection against electric shocks and should never be used on live electric circuits.
- Don't use pliers as a hammer.
- Don't hammer on the handles. They may crack or break.
- Don't extend the length of plier handles to secure greater leverage.
- Don't use pliers on nuts or bolts. A wrench will do a better job and with less risk of damage to the fastener.

Frequently asked questions

The head profile on the screw has deformed to such an extent that it cannot be unscrewed with a screwdriver. Which Unior tool can be used in this case?

407/4DP screw pliers are the best choice for unscrewing screws with a damaged head profile.
