

# Kaçavide me kryq (SL/PH) te rrafshet me teh te izoluar, VDE TBI

611VDEETBI

## Profiles

## Product features

- teh: çeliku krom-molibden vanadium-, thekur tërësisht dhe nevrrik
- pik nxirë
- trajtuar: formë ergonomik
- tre komponent material
- varur vrimë
- bërë sipas DIN EN IEC 60900 (VDE 0682-201):2019-04; EN IEC 60900:2018 standarde

## Avantazhet:

- Modeli me teh të pakta
- Edhe pse e tehut të pakta , kaçavidë mundëson të njëjtën funksionalitetit dhe sigurinë , duke punuar si kaçavidë zakonshme izoluar
- blade pakta mundëson punën në vështirë për të arritur vende

\* Imazhet e produkteve janë simbolike. Të gjitha dimensionet janë në mm, pesha në gram. Të gjitha dimensionet e listuara mund të ndryshojnë në tolerancë.

## Usage (pictures)

Dora e madhe zona e kontaktit = më shumë pushtet çift rrotullues

## Safety tips

- Use a screw holding screwdriver to get screws started in awkward, hard-to-reach areas.
- Use a stubby screwdriver in close quarters where a conventional screwdriver cannot be used.
- A rounded tip should be redressed with a file; make sure edges are straight.
- Screwdrivers used in the shop are best stored in a rack. This way, the proper selection of the right screwdriver can be quickly made.
- Keep the screwdriver handle clean; a greasy handle is apt to cause accidents.
- A screwdriver should never be used as pry bar. If it is overstressed in this manner, the blade might break and send a particle of steel into the operator's arm or even towards his eyes.
- VDE tools that have several parts, have to be assembled correctly before use.
- When working with VDE tools avoid contact with water.

- Don't use pliers on the handle of a screwdriver to get extra turning power. A wrench should only be used on the square shank or bolster of a screwdriver that is especially designed for that purpose.
- Don't expose a screwdriver blade to excessive heat as it may reduce the hardness of the blade.
- Don't use a screwdriver with a split or broken handle.
- Don't use a regular screwdriver to check a storage battery or to determine if an electrical circuit is live.
- Don't use tools that shows sign of wear and have the second layer of plastic visible.
