964/6SOS

Profiles

Product features

- Tool tray dimension: 188 x 364 x 30 mm
- Compatible with drawers of Eurostyle, Eurovision, Euromotion, Europlus and Hercules (front drawers) line

Set includes:

- 1x combination pliers (article 406/1BI) dim. 180
- 1x diagonal cutting nippers (article 461/1BI) dim. 160
- 1x straight long nose pliers with side cutter and pipe grip (article 508/1BI) dim. 170

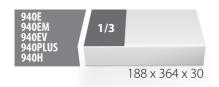

SOS tool trays – advantages:

- material: low density polyethylene foam
- The tool trays are made from foamed polyethylene, which is resistant to grease, petrol, oil, nitro diluents, adhesives and motor oil all of which can easily be removed without leaving any visible residue (stains). Adhesives and motor oil need to be removed immediately by cleaning with petrol in order to avoid permanent staining.
- These tool trays of polyethylene foam are used for clearer and better organised tool storage in tool boxes, tool cases, the drawers of tool carriages and tool cabinets. These tool trays can be used in a

wide range of temperatures, do not absorb dampness and, with normal use, have a long lifespan. They protect the tools by holding them in their own specifically designed place, thus preventing them from moving uncontrollably around in the storage area. As the positions in the tray are precisely defined and designed for each specific tool, it is also easy to establish which tools are missing.

Why Choose Unior:

 Unior is a renowned brand in the industry, celebrated for its dedication to quality and innovation. With a legacy of excellence, Unior tools are crafted to meet the highest standards, ensuring reliability and outstanding performance.

Safety tips

• Pliers should be oiled regularly. A drop of oil at the hinge will lengthen the tool life and assure easy operation.

• When cutting wire with pliers, you should always wear glasses or goggles.

• Handles are provided for comfort. They are not intended to give user any degree of protection against electric shocks and should never be used on live electric circuits.

• Don't use pliers for cutting hardened wire, unless specifically manufactured for this purpose.

• Don't expose pliers to excessive heat. This may ruin the tool.

• Don't use pliers as a hammer.

• Don't hammer on the handles. They may crack or break.

• Don't extend the length of plier handles to secure greater leverage.

• Don't use pliers on nuts or bolts. A wrench will do a better job and with less risk of damage to the fastener.
