Crimping pliers

425/4B

Profiles

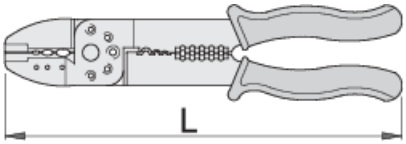

Premium

Product features

- material: premium plus carbon steel
- entirely hardened and tempered
- surface finish: phosphated to standard DIN 12476
- heavy duty plastic handles

Usage:

- for insulated and non-insulated open terminals (1,5-6mm²), for cutting cables, screws and stripping insulation

	mm²	L	
601137	1.5 - 6	240	320

* Images of products are symbolic. All dimensions are in mm, and weight is in grams. All listed dimensions may vary in tolerance.

Frequently asked questions

Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?
When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.

Must the screw be screwed using the crimping pliers or can it just be pushed into the hole?
A screw with the appropriate dimensions must be screwed using the appropriate punch on the pliers.
