

WARNING

1. Some bike manufacturers recommend not clamping thin-walled carbon fiber frames. Consult manufacturer for suggested clamping location.
2. To avoid damage to the seatpost or bike frame, always clean the clamping position on the bike and the jaws before clamping.

OPOZORILO

1. Nekateri proizvajalci koles priporočajo da tanjših karbonskih koles ne vpenjate. Posvetujte se z vašim proizvajalcem koles za pravilno uporabo.
2. Da se izognete poškodbam okvirja ali sedežne opore kolesa, vedno očistite mesto vpenjanja in čeljust stojala.

INSTALLATION SAMPLES

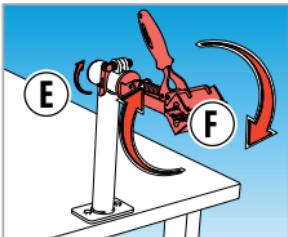

When mounting swiveling vice jaw on the workbench (A), always mount like shown above. Mount jaw with two screws (B) that are included. • Vpenjalno glavno privijemo na delovni pult (A) s pomočjo dveh priloženih lesnih vijakov (B) kot prikazuje slika.

When mounting swiveling vice jaw to the wall, always mount plate and jaw like shown above. Screw vice jaw with four screws to the wall. • Vpenjalno glavo privijemo na zid (C) s pomočjo štirih priloženih vijakov (D) kot prikazuje slika.

ADJUST VICE JAWS

To adjust bike stand head position, release lever (E) and adjust/rotate the head (F). • Za nastavite glave stojala sprostite vzvod (E) in nato nastavite željeno pozicijo (F) glave stojala.

Adjust opened jaws (G) to seatpost or bike tube. Turn handle (H) until jaws firmly grabs the tube. • Nastavite odprto čeljust (G) sedežno oporo ali cev okvirja. Obrnite ročaj (H) dokler čeljusti ne zajamejo celotne cevi.

RELEASING BIKE

Firmly hold bike frame (I). Flip handle (J) to quickly release tube from jaws.
• Trdno primitte okvir kolesa (I). Obrnite ročaj (J) za hitro sprostite cevi iz čeljusti orodja.
